

Automatic Gel Dispensing System GDS-10:20:50

Easy use flexible system for daily duty.

Automatic gel dispensing system. Driven by electric signal from the main machine, usually 42VDC (but can be other based on request).

Can be easily installed on all tube/pipe bending machines. By dosing minimum needed amount of lubricant at the right point helps to reduce the production cost, increase bending quality and tool life. Higher process efficiency and less scrap are also important factors for quick pay back of the system.

Operating principle : Air and Electric
Operating pressure : 6-8 Bar
Operating voltage : 24V
Tank Capacity : 10; 20; 50 Kg
Pressure ratio : 45:1
Cylinder Diameter : Ø62mm
Efficiency : 1.400 g/min

Advantages:

- Clean and easy use
- Significant less lube consumption
- Precise adjustable amount
- Uniform dosing with high repeatability
- For high viscosities lubricants
- Size of container 10; 20; 50 l

Applications:

Any paste/gel lubricant anywhere you need easy use and reliability.
